

Please make rules from FCC to required ALL of VRS provider to be able to access any 8 or more VRS. Sorenson VRS's VP-100 won't let me choose which VRS I want to use because sometime they are too busy to answer. So I would like to go like Sprint VRS or HandonVRS or any other VRS in case if any of them is not busy. That is very important amongst deaf people when they try to contact just like the hearing do. Thanks.
